Open Position: Microsoft Full Stack Developer

Location: Boston

Job Type: Full-Time, Hybrid

Salary: From $103,700 per year

Massachusetts Property Insurance Underwriting Association is seeking a Microsoft Full Stack Developer to join our Information Technology Department.

This role focuses on the development and ongoing maintenance of top-tier web applications and systems, ensuring they meet our business objectives, and includes the responsibility for updating and patching all application servers. This position reports to the IT Director, Software Development and Data Analytics and has no supervisory responsibilities.

JOB REQUIREMENTS:

This position requires either a bachelor's degree in Computer Science or a related field, or equivalent proven work experience, along with a minimum of 5 years of experience in Information Systems, including at least 4 years of programming experience with 2 of those years in Full Stack Development. Proficiency in HTML, CSS, Angular JS/Angular, PHP, WCF, Web API, ASP.Net MVC, and the .NET Framework is required. Additionally, a solid understanding of relational database concepts is essential.

Candidate must also possess a working knowledge of VB .Net, VB Scripts, XML, Java, SQL, Visual Cobol, and Visual C#. An understanding of web-based solutions, including IIS, Apache, and Tomcat, is necessary. Strong attention to detail, organizational skills, research abilities, and effective communication skills are crucial. The ability to manage multiple projects simultaneously with minimal supervision and a high level of accuracy is also required.

RESPONSIBILITIES:

1. Design, develop, and implement highly responsive web-based applications using the latest technologies and frameworks.

2. Troubleshoot and resolve issues in collaboration with the network and database administration teams.

3. Collaborate with the IT team to maintain and enhance the application's performance, security, functionality, adaptability.

4. Collaborate with cross-functional teams to analyze requirements, design solutions, and integrate them into existing systems.

5. Use a variety of programming languages and tools to create a secure, user-friendly software.

6. Stay abreast of developments in web applications and programming languages including emerging trends and technologies.

7. Develop front end website architecture and back end website applications.

8. Ensure that transmissions to and from third-party vendors and service providers are secure.

9. Evaluate new technologies for use at the Association.

10. Administer and maintain all the Association's websites.

11. Develop database applications with MySQL, Microsoft SQL Server and Oracle databases.

12. Translates detailed specifications into programming code. Keys new programs and program changes. Compiles, tests, and debugs programs after keying changes.

13. Uphold development standards, ensuring adherence to industry-recommended guidelines.

14. All other duties and projects as assigned.

We offer an excellent benefits package, a matching 401(k) program, pension, a hybrid work schedule and we are conveniently located in Government Center.
